

`.Homework`

1 NAME

`Homework` - Read and print the contents of files with options.

2 SYNOPSIS

Homework [OPTIONS] FILE...

3 DESCRIPTION

Homework reads the contents of files and prints them to the standard output line by line. It provides options to control printing behavior.

4 OPTIONS

- **-h, --help**: Display this help message.
- **-r, --reverse**: Reverse each line before printing.
- **-d DELAY, --delay DELAY**: Specify a delay in seconds or fractions thereof. Example: `-d 0.5` for a 500 milliseconds delay.

5 FILES

The `FILE` argument(s) should be the names of the files whose contents need to be printed.

6 RETURN VALUE

- 0 on success.
- 1 on error, such as file not found.
- All other results printed to `STDOUT`

7 SEE ALSO

- `[man(1)]`(<https://linux.die.net/man/1/man>)
- `[getopt(3)]`(<https://linux.die.net/man/3/getopt>)
- `[usleep(3)]`(<https://linux.die.net/man/3/usleep>)
- `[fprintf(3)]`(<https://linux.die.net/man/3/fprintf>)
